SUMMARY

Passionate Backend Developer and BEIT student with hands-on experience building scalable web applications and network analysis tools using Python and FastAPI. Skilled in API development, authentication systems, database design, and software architecture. Strong interest in backend engineering, cybersecurity, and open-source development, with experience participating in hackathons and collaborative projects.

EDUCATION

Bachelor of Engineering in Information Technology

Pokhara University | *Expected Graduation: 2028*

High School

Shree Amar Secondary School, Ilam | *GPA: 3.45 (2021–2023)*

EXPERIENCE

Hackathon | NOSK Hackathon:

Collaborated with a team to design and develop a prototype addressing real-world challenges.

Hult Prize Participant – NCIT:

Pitched a startup idea focused on sustainable technology solutions.

PROJECTS:

FleetPulse – Real-Time Fleet Management System:

Tech Stack: FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker

- Built a scalable backend with secure authentication, RBAC, and geospatial driver-passenger matching.
- Developed modular REST APIs for fleet and trip management using a service-oriented architecture.

GitHub: <https://github.com/Arjun-Bhattarai/fleet-pulse>

NetRecon – Network Scanner & Reconnaissance Tool:

Tech Stack: Python, Socket Programming

- Built a modular Python-based network reconnaissance tool for host discovery and network analysis.
- Implemented multi-port scanning and service detection to identify active services on target systems.
- Designed reusable scanning modules for extensibility and future cybersecurity enhancements.

GitHub: <https://github.com/Arjun-Bhattarai/NetRecon>

SKILLS

Languages: Python, SQL

Backend: FastAPI, REST APIs, JWT Authentication

Databases: PostgreSQL, SQLAlchemy, sqlalchemy

Tools: Git, GitHub, Docker, Postman

Concepts: OOP, Database Design, RBAC, Network Programming
